Foreign Agricultural Trade of the United States

May/June 1987

IMPORTANT INFORMATION ABOUT YOUR SUBSCRIPTION

Foreign Agricultural Trade of the United States is published six times a year with two supplements. Subscription prices are \$21 a year domestic and \$26.25 foreign (prices subject to change). Send check or money order payable to *Superintendent of Documents* to Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. For faster service, call (202) 783-3238 and charge your subscription to your VISA, MasterCard, Choice, or GPO Deposit Account.

IS IT TIME TO RENEW?

Your subscription to this publication may be due to expire soon. If so, you will get a renewal notice in the mail from GPO about 90 days ahead of time. *Only one notice is sent.* You must return it promptly to ensure uninterrupted service. If you have misplaced your renewal notice, use the form on the back of this report. Be sure to attach mailing label.

DIGEST

U.S. Agricultural Exports in Transition (*see p. 2*). U.S. agricultural exports in the first 7 months of fiscal year (FY) 1987, a transition year, reached 75 million tons, slightly exceeding volume for the same period of 1986. FY 1987 is the first fiscal year after implementation of new farm programs under the Food Security Act of 1985. Value in the October 1986–April 1987 period dropped \$493 million from its year-earlier level to \$16.8 billion. Exports of high-value products increased in value and volume, but bulk exports fell as volume of raw grain and oilseed exports dropped 1 percent to 56.6 million tons. Prices fell for wheat, corn, and soybeans.

U.S. Agricultural Imports Up Slightly (*see p. 74*). Imports during the first 7 months of FY 1987 totaled \$12.4 billion, 1 percent above the record high of the same months of 1986. Coffee prices have fallen 56 percent since January 1986, and sugar imports are expected to be at their lowest level in 75 years.

Commodity Price Changes Mixed (*see p. 120*). Grain prices rose with dry U.S. weather, concern for inflation, and renewed overseas sales, but commodity prices remained low compared with years past. Coffee prices fell dramatically as deadlocked negotiations of the International Coffee Organization prevented imposition of export quotas.

U.S. Agricultural Aid Abroad Declines (*see p. 124*). Preliminary data show that concessional agricultural exports under U.S. Government-financed programs in calendar year 1986 fell about 30 percent in volume to 5.8 million tons. Value dropped 45 percent to slightly more than \$1 billion. Fewer shipments in the wake of the waning African famine and lower commodity prices caused the drop from the high levels of 1985.

Japan Remains Top Market for U.S. Agricultural Exports (*see p. 129*). Japan has remained the leading market for U.S. agricultural exports for the last 5 years (FY 1982–86), followed by The Netherlands, USSR, Canada, Mexico, South Korea, and Taiwan. Soybeans and products have led exports, followed by feed grains and products, wheat and products, and cotton and lint.

Major Markets for Agricultural Products (*see p. 136*). Major markets for agricultural imports remained essentially the same in 1976–85. The 10 largest agricultural import markets in 1976–85 were the United States, West Germany, the USSR, Japan, Italy, the United Kingdom, France, The Netherlands, Belgium–Luxembourg, and Canada. These countries accounted for about 60 percent of the value of world agricultural imports.

Prepared by the Commodity and Trade Analysis Branch, Commodity Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators were Thomas A. Warden, and Mary L. Fant. Denise Morton provided word processing and table formatting support. Editorial support was provided by Linda L. Hatcher, Research Information Branch, Economics Management Staff. Data processing support was provided by Sharlan Starr and William Meiller, International Economic Systems Branch, Data Services Center.

U.S. AGRICULTURAL EXPORTS IN TRANSITION

U.S. agricultural exports, passing the halfway point of a transition year, reached 75 million tons in the first 7 months of fiscal year (FY) 1987, slightly exceeding volume for the same period of 1986. FY 1987 is the first fiscal year after implementation of new farm programs under the Food Security Act of 1985. Export value in the October 1986–April 1987 period dropped \$493 million from its year-earlier level to \$16.8 billion. Exports of high-value products increased in value and volume, but bulk exports fell as volume of raw grain and oilseed exports dropped 1 percent to 56.6 million tons. Prices fell for wheat, corn, and soybeans.

The 1985 Act lowered loan rates for U.S. crops, authorized marketing loan programs, and increased the use of the Export Enhancement Program (EEP) to boost world demand and raise the U.S. share of world trade. These measures have reduced prices for many U.S. agricultural exports, boosting sales. A continued increase in export volume through the end of FY 1987 would mark the first such increase in 7 years. Shifts in seasonal export patterns and gains and losses to various export customers highlight the transitional nature of the year.

Sales to Some Customers Higher

U.S. agricultural exports to Latin America, Canada, the European Community (EC), the Middle East, and middle-income countries of East Asia (Other East Asia) rose in value in the first 7 months of FY 1987 over those of the same period in 1986. Exports to Latin America rose \$140 million as rising sales to Mexico, Brazil, Central America, and the Caribbean more than offset weaker sales to Venezuela. Venezuela banned corn imports to save foreign exchange, and Mexico constrained its imports because of difficulties in finalizing a September 1986 debt agreement.

Sales to Other East Asia and the Middle East rose as programs under the 1985 Act boosted cotton sales to Taiwan and Korea, and assisted U.S. barley shipments to Saudi Arabia. U.S. agricultural exports to the EC rose to \$4.8 billion, mainly due to increased high-value exports. High-value exports to the EC climbed as more favorable U.S. exchange rates with major customers reduced the cost of these products in local currencies without lowering U.S. prices. Gains in high-value exports to the EC were sufficient to offset the effect of lower grain sales. However, similarly favorable changes in exchange rates and high-value exports barely sustained agricultural exports to Japan. U.S. exports to Japan remained at \$3.4 billion because of lower grain prices. Lower grain prices reduced the value of exports to North Africa, despite an 11-percent increase in U.S. grain sales there.

Exports to USSR Substantially Lower

Exports to Sub-Saharan Africa, South Asia, and Eastern Europe also fell, but exports to the USSR declined most, falling 85 percent, or \$865 million. A seasonal shift in Soviet buying, changing Soviet demand, and choice of suppliers was largely responsible for the decline. The USSR had taken no U.S. soybeans or wheat by the end of April 1987 and only 1.9 million tons of corn compared with 1.5 million tons of soybeans, 153,000 tons of wheat, and 6.6 million tons of corn by the end of April 1986. However, the volume of corn awaiting shipment was 1.8 million tons higher in April 1987 than in April 1986. Shortly after the end of April 1987, the USSR bought more U.S. wheat than in all of FY 1986.

In previous years, U.S. agricultural exports to the USSR were heavier before April than after. U.S. shipments to the USSR started slowly in FY 1987 due to the Soviet's large

1986 grain crop, which was 210 million tons, the largest in 7 years. A dry autumn, a harsh winter with near-record grain winterkill, and a late spring subsequently increased Soviet interest in buying U.S. grain. Shipments to the USSR started in March and tripled in April.

Exports of Unprocessed Grains Lower

U.S. feed grain exports in the first 7 months of FY 1987 fell 27 percent below those of the same period in 1986 to \$2.1 billion. Export volume rose slightly, despite the shift in Soviet buying. Reduced sales to Spain and Portugal since the introduction of the EC's variable levies more than offset increased sales to The Netherlands and Belgium, leaving U.S. corn exports to Western Europe 1 million tons below year-earlier levels. Exports to the USSR were 4 million tons lower, but an EEP initiative encouraged Saudi Arabia to purchase 2 million tons of barley from the United States rather than from foreign competitors. Weaker foreign competition also boosted exports to Korea 1.1 million tons higher.

U.S. wheat exports in the first 7 months of FY 1987 dropped \$500 million as both prices and volume fell. Export volume was about 900,000 tons, or 6 percent, below year-earlier levels at 12.6 million tons. A record-high harvest in Pakistan reduced U.S. exports there from 812,000 tons in the 7-month period of FY 1986 to less than 60,000 tons in the same period of 1987. Sales to Europe fell as Portugal's entry into the EC shifted its trade away from non-EC exporters. In addition, increased use of gluten produced from low-protein EC wheat crowded out high-protein U.S. wheat traditionally used to improve milling characteristics of domestic EC wheat.

Continued use of EEP initiatives pushed U.S. wheat exports to North Africa slightly above the previous year's 3 million tons. Exports to Algeria slipped because of an improved local crop, but sales to Tunisia soared 569,000 tons following a poor crop. EEP initiatives also raised exports to Eastern Europe from 61,000 tons to 595,000 tons.

Strong Gains For Processed Grain Products

Led by strong corn-gluten exports to the EC, U.S. exports of processed grain products climbed 25 percent in volume to 7.1 million tons and 15 percent in value to \$1.1 billion. U.S. exports of blended food products fell with the amelioration of Africa's food emergency, but exports of other grain products rose on the strength of sales to developed countries. Europe continued importing U.S. feeds and fodders (excluding oilcake), mostly in the form of corn gluten, faster than in FY 1986 even after the threat of EC corn gluten quotas passed on January 1. The EC has long been the major U.S. customer for these products due to high European grain prices. Larger EC purchases in the first 7 months of FY 1987 helped boost U.S. feed and fodder exports \$158 million.

Favorable exchange rates were probably part of the reason for increased U.S. exports to the EC, because exports to Japan also rose. On the other hand, sales fell to Canada, Latin America, and Other East Asia, partly because the shift in U.S. exchange rates against currencies of those countries was not nearly as favorable as in Europe and Japan.

Value of Oilseed and Product Exports Down

Lower prices and export volume for vegetable oil and soybeans reduced U.S. oilseed and product exports 9 percent to \$4.2 billion. Vegetable oil exports fell 42 percent in volume, and export prices averaged \$76 lower. Volume fell as decreased consumer purchasing power and increased competition in Mexico lowered U.S. sales there. Exports to Pakistan and Africa were also lower as their need for imports fell.

U.S. soybean exports slipped 919,000 tons in the first 7 months to 14.8 million tons. The decline in soybean exports was proportionally smaller than that for vegetable oil exports, but as late as February, export volume was above year-earlier levels. U.S. exports flagged towards winter's end with the growing assurance of increased supplies from the Southern Hemisphere, whereas exports rose in the same period of 1986 in anticipation of shrinking supplies in the wake of a Brazilian drought. Low production in Brazil also boosted U.S. soybean meal exports, which by the end of April, remained 1.2 million tons higher than those of the same period in 1986. Overseas customers for U.S. soybean meal are predominantly concentrated in Western Europe, and U.S. sales there probably received an additional stimulus from stronger European currencies.

Cotton Exports Up 170 Percent

U.S. cotton exports in the first 7 months of FY 1987 rose 535,000 tons and \$386 million dollars as shipments rebounded from a very poor showing in FY 1986. Lower U.S. prices under a marketing loan program in the 1986/87 marketing year boosted competitiveness and sales in the 7-month period of FY 1987, and ironically, reduced sales in the same period of FY 1986.

The United States lost much of its market share in FY 1986 as buyers postponed purchases in anticipation of the new 1986/87 marketing loan program. Lower exports in FY 1986 were not concentrated in any particular market, and the recovery in the first 7 months of FY 1987 was also across the board, although sales to Other East Asian countries were notably buoyant. U.S. agricultural exports to Western Europe and Japan each rose 100,000 tons in the 7-month period, and those to Other East Asia rose 194,000 tons. (*Stephen MacDonald, Commodity and Trade Analysis Branch*)

U.S. AGRICULTURAL IMPORTS UP SLIGHTLY

U.S. agricultural imports in the first 7 months of fiscal year (FY) 1987 (October 1986–April 1987) totaled \$12.4 billion, 1 percent above the record high of the same months of 1986. Imports for FY 1987 may drop 4 percent below FY 1986's record high of \$20.9 billion to \$20 billion. The weaker U.S. dollar, beginning in 1985, is raising U.S. import costs, in contrast to the experience of the previous 4 years when the dollar appreciated against virtually all major currencies. Agricultural import prices have been falling in recent months, reflecting among other things, the weaker dollar.

Coffee Prices Plummet

The dramatic drop in coffee prices since June 1986 has been a significant factor in the fall of import prices. ^{1/} After rising from \$1.33 a pound in August 1985 to \$2.41 a pound in January 1986, prices have plummeted to around \$1.05 in recent months. A freeze substantially reduced the 1985 Brazilian coffee crop, driving prices up in early 1986. The inability of the International Coffee Organization (ICO) to agree on limiting exports among its members and expectations of a large Brazilian harvest are primarily responsible for the current decline in prices.

Coffee import prices vary more than retail coffee prices. While importers and wholesalers react to a Brazilian frost (or lack of one) by buying accordingly, retailers try to smooth out price movements so as not to lose customers. Instant coffee prices at the retail level moved closely with real per capita disposable income in 1972–86. U.S. coffee import volume for the first 7 months of FY 1987 fell 12 percent from those of the same period of 1986 to 651,000 tons. Brazilian shipments to date are only 68 percent as large as those of 1986.

Noncompetitive imports accounted for 33 percent of total U.S. agricultural imports in the 7-month period. Coffee, cocoa, bananas, rubber, spices, and tea made up about 95 percent of the value of all noncompetitive imports. Tea prices fell early in the year as Pakistan, a major importer, closed off its market to imported Kenyan tea, and India abolished export quotas on tea that had been in existence since 1984. China, Indonesia, and Argentina are the largest suppliers of tea to the United States.

Noncompetitive import volume has varied less over the last 15 years than either agricultural exports or competitive imports. Wheat, corn, and soybeans, the primary export commodities, varied 23, 28, and 26 percent, respectively, over the same period. While coffee import volume varied around its mean by 9 percent in 1972–86, import unit values fluctuated by 39 percent, indicating a need for a large price adjustment in the world coffee market for a proportionately smaller quantity adjustment. The import demand elasticity is small.

Sugar Import Quota Set at 1 Million Tons

U.S. sugar imports in FY 1986 fell to their lowest level in 75 years, and those in FY 1987 will be even lower. Imports through April were 957,000 metric tons, 16 percent below those of a year earlier. This includes nonquota imports that are subsequently re-exported. U.S. sugar production in 1985 was over 6 million short tons (1 short ton = 2,000 pounds), with production in 1986 expected around 6.6 million tons, the highest level since 1976. Imports of cane and beet sugar (almost exclusively cane sugar) have been subject to restrictive import quotas since 1982. Country-by-country quotas for calendar

^{1/} Brazilian coffee, including cost, insurance, and freight cost, New York.

year 1987 were set at 1 million short tons and nonquota sugar for re-export is estimated at 450,000 tons. For orderly sugar marketing, shipping schedules are established on a quarterly basis for the top 10 suppliers, accounting for about 70 percent of the total.

The meat import trigger level for 1987 remains unchanged at 1.44 billion pounds. Imports of fresh and frozen beef and pork rose 17 percent in the first 7 months of FY 1987. Live cattle imports from Mexico increased 55 percent as Mexico increased its export quota 11 percent to 1 million head. Live hog imports from Canada, however, continued to fall, dropping 27 percent below those of the same period in 1986. (*Stephen R. Milmoie, Commodity and Trade Analysis Branch*)

COMMODITY PRICE CHANGES MIXED

Grain prices rose with dry U.S. weather, concern for inflation, and renewed overseas sales, but commodity prices remained low compared with years past. Coffee prices fell dramatically as deadlocked negotiations of the International Coffee Organization (ICO) prevented imposition of export quotas.

Grain Prices Higher

Grain prices rose seasonally in early 1987 and were further buoyed by growing expectations of inflation and apparent changes in supply and demand. Record-high spring temperatures in several States in the West and dry weather across much of the U.S. grain belt raised concern about U.S. production. Prospects for Soviet grain production also deteriorated as a cold spring delayed field work in the USSR. The USSR's dry autumn and extensive winterkill increased the likelihood that later events might trim the Soviet crop. In late February, the Soviets bought U.S. corn for the first time since June 1986 and continued buying through the end of April. In addition to renewed Soviet interest in U.S. grain, concern that inflation may grow bolstered grain prices. With petroleum prices apparently stabilized and the U.S. dollar weaker on foreign exchange markets, import prices could rise, pulling up other prices.

Inflation concerns and dry U.S. weather helped raise soybean prices, but prices for other oilseed products responded to other factors. Soybean oil prices rose, despite record-high U.S. stocks, as the lagged effects of poor rainfall curtailed production of competing oils. After a year of below-normal rainfall in Malaysia, production and stocks of palm oil began to fall, while low rainfall in the Philippines slowed growth in coconut oil production there.

Cotton Prices Higher Since August

Cotton prices resumed growth in April after dipping in February and March. Introduction of a U.S. marketing loan program for cotton initially drove prices down, but since then, higher than expected consumption and lower than expected availability have helped boost prices. World cotton imports continue strong because developing textile exporters are still comparatively free to sell their products. Last year's renegotiation of the Multi-Fiber Accord and extensive bilateral consultations between textile importers and exporters deflected development of extreme trade restrictions. Reassessments of China's cotton export availability since August also bolstered prices.

Coffee Prices Much Lower

Prospects of a rebounding crop in Brazil continued to depress coffee prices in 1987. Although prices in January 1986 were the highest since 1977, prices in January 1987 averaged \$2,500 per ton lower. The deadlock of ICO negotiations over export quotas subsequently drove prices even lower. Negotiations foundered over whether the quotas each exporter receives should be the same as before Brazil's drought or should be adjusted to reflect long-term shifts in coffee producers' shares of world production. (*Stephen MacDonald, Commodity and Trade Analysis Branch*)

U.S. AGRICULTURAL AID ABROAD DECLINES

Preliminary data show that concessional agricultural exports under U.S. Government-financed programs in calendar year 1986 fell about 30 percent in volume to 5.8 million tons and 45 percent in value to slightly more than \$1 billion. Fewer shipments in the wake of the waning African famine and lower commodity prices caused the drop from the high levels of 1985. Shipments under Public Law (P.L.) 480, accounting for about 80 percent of value, declined by about the same proportions. Overseas donations under Section 416 of the Agricultural Act of 1949, as amended, declined 45 percent in volume and about 60 percent in value. Exports under the Mutual Security Act fell about 30 percent in volume but only 1 percent in value.

P.L. 480 shipments in 1986 fell about 30 percent in volume to about 5.1 million tons and about 45 percent in value to slightly more than \$800 million. Shipments under Title II declined more than under Titles I and III. Top commodities in value were wheat, soybean oil, and wheat flour, accounting for about 75 percent of P.L. 480 shipments. Chief recipients were Egypt, Bangladesh, and Pakistan, together accounting for slightly more than 30 percent of value.

Shipments under Titles I and III totaled 3.7 million tons, worth about \$810 million. Top commodities were wheat, flour, and rice, accounting for more than 85 percent of the value of Title I and III shipments. Chief recipients were Egypt, Bangladesh, and Sudan.

Title II shipments were nearly 1.4 million tons, worth almost \$275 million. Wheat, soybean oil, and bulgur wheat were the major commodities, accounting for about 60 percent of Title II commodities. India, Ethiopia, and Pakistan received almost half of the shipments. Voluntary relief agencies, such as CARE and Catholic Relief Services, distributed about 55 percent of the commodities, while the World Food Program distributed 30 percent, both up in percentage terms from 1985. Distributions through government-to-government channels accounted for about 15 percent of the Title II total, down in percentage terms from those of 1985.

Overseas donations under Section 416 of the Agricultural Act of 1949, as amended, fell to about 190,000 tons, worth slightly less than \$110 million. Nonfat dry milk and anhydrous milk fat accounted for nearly 75 percent of shipments, although other dairy products, wheat, and bulgur wheat were exported under the program. Mexico, Brazil, and Poland received slightly more than half of the exports.

Exports under the Mutual Security Assistance programs in 1986 fell almost 30 percent in volume but remained almost constant in value. Wheat and seeds accounted for almost 75 percent of the value. Pakistan and Egypt received 85 percent of the value. (*Mark E. Smith and Fannye G. Lockley, Commodity and Trade Analysis Branch*)

1/ Preliminary.

2/ Negative values in the "commercial" column indicate an excess of Government programs over total exports attributed to reporting lags, classification differences, or transshipments through other countries.

3/ Total excludes baby chicks and cattle-dairy.

1/ Preliminary.

1/ Preliminary.
2/ Negative values in the "commercial" column indicate an excess of Government programs over total exports attributed to reporting lags, classification differences or transshipments through other countries.

Table 22--U.S. agricultural exports: Concessional Government-financed programs and commercial, volume by commodity, calendar year 1985 1/

1/ Preliminary.

2/ Negative values in the "commercial" column indicate an excess of Government programs over total exports attributed to reporting lags, classification differences, or transshipments through other countries.

3/ Total excludes baby chicks and nonalcoholic beverages.

JAPAN REMAINS TOP MARKET FOR U.S. AGRICULTURAL EXPORTS

Japan has remained the leading market for U.S. agricultural exports for the last 5 years (fiscal years (FY) 1982-86), followed by The Netherlands, USSR, Canada, Mexico, South Korea, and Taiwan. Soybeans and products have led exports, followed by feed grains and products, wheat and products, and cotton and lint. Over 60 percent of the value in FY 1986 went to 10 countries, with Japan, The Netherlands, and Canada being the top three. Japan accounted for 17 percent of the value in 1982-86. Shipments to Japan more than doubled those to The Netherlands. Exports to Japan have included feed grains, soybeans, live animals, wheat, hides and skins, fruit, tobacco, and cotton.

Soybeans and products and feeds and fodders have made up over half of U.S. agricultural exports to The Netherlands since FY 1982. Much of these exports have been forwarded to other destinations from The Netherlands (data in the tables have not been adjusted for transshipments through The Netherlands).

Canada is both an important U.S. market and a keen competitor. Although Canada buys many U.S. farm products, over 30 percent are fruits and vegetables. A major exporter of wheat and barley, Canada competes with the United States in world markets. Since FY 1982, Canada has ranked fourth as a U.S. export market, following the USSR.

An important but variable market for U.S. agricultural exports, the USSR ranged from ninth place in FY 1983 to second place in FY 1984 and FY 1985, down to seventh place in FY 1986. These variations reflect changing U.S. and USSR agricultural policies and competitive pricing among other exporters. Other factors contributing to the 56-percent drop in Soviet imports of U.S. farm products since 1985 include increased Soviet grain production and lower prices for crude oil, a major source of foreign exchange.

Mexico has gained in importance as a market for U.S. farm products. From a ninth-place ranking in 1982, Mexico has placed fourth or fifth each year since, and over the whole period, has ranked fifth. Corn is usually the main U.S. export to Mexico, where it is used as a food grain. Soybeans are another significant U.S. export to Mexico. Lower crude oil prices over the past year have diminished Mexico's foreign exchange earnings and, hence, limited its import capacity.

Korea and Taiwan, growing markets for U.S. exports in recent years, together took 9 percent of U.S. agricultural exports in 1986. Since 1982, they have ranked sixth and seventh, respectively, in imports of U.S. farm products. They are strong markets for U.S. hides and feed grains. Both countries have shown strong income growth in recent years and have increased their meat consumption since the 1970's, which explains their demand for U.S. feed grains.

China ranked sixth in imports of U.S. farm products in 1982, primarily because it was the top wheat customer, taking 17 percent of U.S. wheat exports. China's demand for U.S. grains has fallen since then, however, and this market has not reappeared among the top 10.

Soybeans and Feed Grains Lead Commodity Exports

Soybeans and products have been the top U.S. commodity export in 3 of the last 5 years, and feed grains ranked first in the other 2 years. The Netherlands and Japan have led U.S. soybean markets over the last 5 years, taking 18 and 15 percent, respectively. Japan has been the largest foreign market for U.S. feed grains, ranking first in 4 of the 5 years and

taking 26 percent of U.S. feed grain exports. Feed grains were second to soybeans and products over the 5-year period, constituting almost one-fifth of the value of U.S. agricultural exports.

Wheat and products have ranked third among U.S. agricultural exports over the last 5 years. The USSR has been the leading customer, followed by Japan and China. Increased U.S. Government assistance in FY 1986 boosted wheat exports, of which nearly 66 percent involved the Export Enhancement Program (EEP), Public Law 480, or credit guarantees. EEP alone assisted 15 percent of the FY 1986 wheat shipments.

Cotton and linters have ranked fourth among U.S. commodity exports since 1982, with Japan again leading all other countries in its imports. Cotton exports dropped from their usual 4th place to 10th in FY 1986 as the U.S. market share fell, buffeted by record-high world supplies and undercut by lower priced competitors. (*Roger Spindler, Centrally Planned Economies Branch, Agriculture and Trade Analysis Division, and Cecil Davison, Crops Branch*)

MAJOR MARKETS FOR AGRICULTURAL PRODUCTS

Major markets for agricultural imports remained essentially the same in 1976-85. The 10 largest agricultural import markets in 1976-85 were the United States, West Germany, the USSR, Japan, Italy, the United Kingdom, France, The Netherlands, Belgium-Luxembourg, and Canada. These countries accounted for about 60 percent of the value of world agricultural imports. In 1985, they imported \$141 billion, or 61 percent, of all farm products. The only changes in the top 10 rankings in 1976-85 were in 1980 when China replaced Canada as the 10th largest market and in 1981-84 when Saudi Arabia replaced Canada. Canada regained its 10th position from Saudi Arabia in 1985 when Saudi Arabia greatly reduced its imports due to declining oil revenues and general agricultural demand.

Changing Markets: Growth and Decline

Major growth markets for agricultural imports during the period were the developing countries, primarily the Middle East. Saudi Arabia, ranked number 26 in 1976, number 10 in 1981-84, and number 11 in 1985. Egypt, with imports valued at \$3.2 billion in 1980-84 and \$3.7 billion in 1985, moved from number 21 in 1976 to number 12 in 1984 and 1985. Iraq, with imports valued at \$1.5 billion in 1976, moved from number 44 to number 22 in 1985.

Markets outside the Middle East also grew. Mexico moved from number 46 in 1976 to number 20 in 1985 on the strength of \$2.25 billion in imports in 1985. Nigeria jumped from number 57 in 1970 to number 26 in 1984 with imports valued at \$1.5 billion. Nigeria fell to number 34 in 1985. Taiwan, on the other hand, rose steadily from number 23 in 1976 to number 17 in 1985. China, ranking number 10 in 1980, fell to number 18 in 1984 and to number 25 in 1986 because it increased domestic production and reduced imports 60 percent.

Import values in Poland and East Germany, the two largest markets in Eastern Europe, fell between 1976 and 1985. Imports in East Germany fell 25 percent between 1984 and 1985, accelerating its decline in ranking from number 15 in 1974 to number 27 in 1985. Poland's market size, like East Germany's, decreased during the period. Poland ranked number 14 in 1976 but only number 36 in 1985, dropping most sharply when its agricultural imports fell 16 percent from \$2.16 billion in 1984 to \$1.28 billion in 1985.

U.S. Market Shares

The U.S. market share of world agricultural imports dropped from the 1980-84 average of 16.8 percent to 13.2 percent (\$230.44 billion) in 1985, the lowest level since 1970 when the world market for agricultural products was only \$56.6 billion. In 1985, the U.S. market share fell in 43 of the 50 major agricultural markets, increasing only in Austria, Algeria, Brazil, Ireland, Finland, and the United Arab Emirates. The U.S. market share fell 20 percent or more in 25 of the 50 major markets between 1984 and 1985. The largest declines in U.S. market shares were registered in Morocco (70 percent); Libya (69 percent); Nigeria (60 percent); China and Bulgaria (58 percent each); Saudi Arabia and Poland (48 percent each); and Australia, East Germany, India, Indonesia, and Switzerland (40-45 percent each). The U.S. market share in the European Community (EC) fell from 10.1 percent in 1980-84 to 6.6 percent in 1985.

The United States had the largest market share (20 percent or better) in only 12 of the 50 major markets in 1985. These countries included Mexico (67 percent); South Korea, Taiwan, and Venezuela (43-46 percent each); Brazil, Canada, Israel, Portugal, and Japan

(32-37 percent each); and Spain, Egypt, and Pakistan (23-25 percent each). These countries imported \$14.5 billion, or about 50 percent, of all U.S. agricultural exports in 1985.

Major Wheat and Wheat Flour Markets

Import markets for wheat and wheat flour (in wheat equivalents) in 1979-85 were highly concentrated in a few countries. For example, 10 leading markets for wheat and wheat flour accounted for over 60 percent of the world import volume in 1980-85, while 6 accounted for over 50 percent. The 10 leading markets were the USSR, the EC, China, Egypt, Japan, Brazil, Algeria, South Korea, Iraq, and Poland. The USSR, by far the largest single market, accounted for over 20 percent of the volume in 1982-85. The EC and China were the second and third largest markets in 1979-85, with each country accounting for over 10 percent in 1974-82.

However, some trends changed in 1982-85 in each of these markets. Import volume and the relative size of the market in the EC increased, while they decreased in China. Increased domestic production in China in 1985 greatly reduced wheat import volume to 5.5 million tons, or by one-half the 1983-84 level, reducing its relative market share. In contrast, the level of trade increased in the EC from 9.95 million tons in 1983-84 to 14.1 million tons in 1985, increasing its relative share of the world market to 13.7 percent in 1985. The growth in the EC market was due primarily to rapid growth in internal trade (intra-EC trade) rather than in imports from outside the EC (extra-EC trade). In fact, extra-EC trade (imports) dropped rapidly in 1982-85 and greatly reduced the real EC market share to 2-3 percent, a level equal to the market size in South Korea, Iraq, and Poland.

The U.S. market share of world trade was about 40 percent during the first half of the 1980's. However, the share dropped about 15 percentage points in 1985 to 25.4 percent, a level not reached since 1954. The decline in U.S. market share in 1985 was due primarily to declines in market shares in some major U.S. markets. Between 1981 and 1985, the U.S. market share in the USSR dropped from 21 percent to 5 percent; in China, from 58 percent to 21.8 percent; in the EC, from 21.9 percent to 6.4 percent; in Egypt, from 44.1 percent to 14.3 percent; in Iraq, from 42.3 percent in 1983 to 21.7 percent; and in South Korea, from 95 percent to 66.7 percent. The U.S. market share in the other top 10 markets (Japan, Brazil, Algeria, and Poland) either increased slightly or remained constant between 1984 and 1985.

Major Corn Markets

Major corn markets in 1979-85 were Japan, the USSR, the EC, Spain, South Korea, Taiwan, and Portugal. These seven markets accounted for about 70 percent of the world's corn market since 1979. The three largest markets (Japan, the USSR, and the EC) consistently took over 50 percent of the world's corn exports since 1979. The growth markets for corn were Japan and the USSR, while the EC was a declining market in both trade volume and relative market size. The EC was the largest market in 1979, importing 17.2 million tons, but fell to number 3 in 1985, importing only 8.98 million tons. The decline in market size in the EC in 1979-85 was due to an increase in domestic production and intra-EC trade.

The U.S. market share in Japan increased from 86 percent in 1979 to 97 percent in 1984 and fell to 77 percent in 1985. The U.S. market share in the USSR fluctuated rather widely from 88 percent in 1979 to a low of 39 percent in 1981 to 76 percent in 1984-85. The U.S. market share in the EC dropped from its high of 71.1 percent in 1981 to 25.4 percent in 1985. The U.S. market share of corn imports declined in Spain, South Korea, and Egypt, while it either remained constant or increased in Taiwan and Portugal.

Major Soybean Markets

Major soybean markets in 1979-85 were the EC, Japan, Spain, Taiwan, and Mexico. These five markets accounted for almost 80 percent of world soybean imports since 1979. The largest markets in 1979-85 were the EC, accounting for about 40 percent, and Japan, accounting for 15-19 percent. The growth markets were Japan, Spain, Taiwan, Mexico, and South Korea, while the declining markets were the EC (46 percent in 1979 to 40 percent in 1985) and the USSR (6.8 percent in 1976 to 3.3 percent in 1985).

The U.S. market share in the EC increased from 75.8 percent in 1979 to 88.1 percent in 1982 and decreased rapidly to 57.6 percent in 1985. The U.S. market share of the Pacific Rim countries of Japan, South Korea, and Taiwan remained rather constant at about 90 percent or more for Japan and 100 percent for South Korea and Taiwan. The U.S. share of the soybean markets in Spain and Mexico declined in 1979-85. (*Arthur B. Mackie, Agricultural and Trade Indicators Branch, and Roger Spindler, Centrally Planned Economies Branch, Agriculture and Trade Analysis Division*)
